Spoštovane kolegice in kolegi, dragi prijatelji!

Danes je prav poseben dan,
ko se ponovno srečamo, ko lahko pustimo za seboj
temno obdobje pandemije s SARS COVID – 19.

Prav zaradi tega je ta čas,
ki ga bomo preživeli skupaj še posebno dragocen.

Na ta prav poseben dan smo organizirali
proslavo in predavanja
v spomin na 20. obletnico prve
perkutane implantacije aortne zaklopke – TAVI.

Neverjetna metoda je zaznamovala
obdobje v katerem živimo.

V posebno čast nam je,
da je med nami
izumitelj in začetnik metode

Prof. Dr. Alain Cribier,

katerega entuziazem in delo posvečeno bolniku
nam vedno predstavlja poseben zgled.

Akad. Prof. Dr. Metka Zorc, dr. med.

Dear colleagues and friends!

Today is really a special day.
We met each other again after the terrible,
dark period of pandemic with SARS COVID - 19.

The time we will spend together
will be especially precious.

Particullary on that day we organize celebration
and lectures dedicated to
20 years of first percoutaneous
implantation of aortic valve – TAVI.

Unbelivable method marked
the time of our lives.

We are specially honoured
that we could greet among us
the beginner and inovator of TAVI procedure

Prof. Alain Cribier, MD, PhD.

We always admire
his entusiastic work dedicated to the patient.
